

Super Stack 6 Pot

Blast and Recycling Skid Mounted System

EQUIPMENT FEATURES

- Vertical design for gravity-feed single pass unit
- No troublesome bucket elevators or screw conveyors
- Compact tower classifier design for exceptionally clean grit with ability to easily run 6-8 blast nozzles without interruption
- Processes steel grit and non-ferrous abrasives (garnet, aluminum oxide)
- Solid state 24VDC blasting controls
- 4-wire deadman switches and exclusive Big Mouth Choke features with remote blast/blowdown/choke
- Works with 150 – 250 HP heavy duty electric vacuums
- Double chambered airlock for continuous vacuuming
- Pleated polyester filter cartridges
- Heavy duty skid with full load lifting eye attachments
- Standard 60-80 ton storage capacity
- Six individual blast pots

OPTIONS

- Optional soft start and variable speed drives on motor
- Optional forklift pockets on heavy duty skid
- Larger abrasive storage capacities available
