

FROST

Fighters

IHS1500

Available in Oil/Diesel or
Propane/Natural Gas

The largest and most powerful indirect fired unit in the Frost Fighter line-up with 1.5 M Btu's of heat. A great fit for large, long term job sites where powerful, reliable heat is needed.

Features :

- Over 80% efficient.
- 2 stage burner operation helps keep fuel cost in line.
- Proven 'multi-Pass' Stainless Steel Heat Exchanger provides industry leading heat transfer.
- Fully insulated shell to minimize heat loss and keep the unit cool to the touch for safety.
- Large powerful fan produces very high CFM as well as static pressure for long duct runs.
- 2 -20inch outlets and 2 -20 inch air returns on the same side help lower the footprint of the heater on the job-site.
- ability to run in continuous ventilation mode.
- minimum of 100 ft of ducting per outlet.
- Durable powder coat finish. (available in custom colours -charges apply)
- Multiple forklift pockets simplify loading and placement of heater.
- Available in 3 phase 208/230V, 460V and 600V.
- ETL Approved

Specifications:

Heating Capacity: 800,000 low fire 1,500,000 high fire
Fuel requirements: LP/NG or Oil/Diesel
Heated air volume: 11,000 CFM
Max Static Pressure: 5"
Max Discharge Temp: 250 °F (121 °C)
Dimensions: 156"Lx44"Wx71"H 2800lbs.

WE. KNOW. HEAT.
